

SDS Lumber LLC.
Planer Operator Job Safety Analysis (**JSA**)

Job Title: **Planer Operator**
Department: Planer
Shift(s): Day

Date Prepared: 11/26/25
Revision Date: 11/26/25
Name:

GENERAL JOB DESCRIPTION

The Planer Operator monitors the dry, rough lumber as it flows from tilt hoist automatically into the Planer. Using a series of buttons/switches, operator can start/stop different chain sections as needed. Watch to ensure no hang ups or upsets occur and must sort out broken or undesired wood so that it does not become stuck in the Planer. This position is responsible for keeping the Planer going which includes, activating a product change, making minor adjustments from console, and knowing the procedure for removing broken boards and restarting (Don't enter planer room while planer is running). Operators must make sure that the chain stays full, and the lumber is flowing straight. If an upset condition were to occur, the operator must follow the proper procedure to remove the upset condition in a safe, timely manner.

EXPERIENCE OR TRAINING REQUIRED

To effectively perform the duties of this job, the employee must be familiar with the different lumber species and be able to read a tape measure to ensure that lumber is being sorted properly. A basic understanding of mechanical drives and energy isolation procedures is necessary. Requires knowledge or experience in lumber operations that provides sound knowledge of mechanical drives, lumber sizes, characteristics by species.
