## **Job Summary**

Using foot pedals and a series of buttons/switches, regulate the flow and start/stop different chain sections as needed. Inspect units for grade, length, size, and species. Markers will be used to classify defective units. Write this information neatly in the upper right corner so the paper wrap station operator can reference it. Any off-grade product/units need to be identified, marked and sorted out to be fixed. Fill bunk magazines and change strap rolls as needed. All units must be squared up and look presentable to the customers. Watch to ensure no hang ups or upsets occur. Operate the wrap station as needed (See Wrap Station Job profile). This is a rotating position, training in other positions will be required as directed by your supervisor. Operators must make sure that the chain stays full, and the units are flowing straight. If a plug were to occur, the operator will follow the proper procedure to remove the plug-up in a safe and timely manner.

## **Job Tasks**

### **Employee Priorities**

- Personal safety.
- Safety of others.
- Quality of the product.
- Quantity (production).

### **Strapper Line**

Visually identify and mark units going into the automatic strapper, while sorting and marking the bad units out. Monitor units to ensure that they are squared up for the strapper. Various alarms will help determine upset conditions. Manually operate strapper to correct and reset alarms in order for Strapper to run. Confirm that product information is being printed properly.

### **Wrap Station**

Learn wrapping procedures and operator's consoles, assist with keeping the units moving when necessary. (See Wrap Station Job Profile)

### **Automatic Grade/Load Printer**

All operators, and Quality Control will work as a team to make sure product is being stamped/labeled properly. Change ink cartridges, when necessary, every board/Load must be correct, it is the everyone's responsibility to notice when the printers are not working properly and notify maintenance or supervisor immediately.

## **Physical Job Demands**

This job is a medium impact job. Job involves standing for long periods of time. Carrying boards to fill out units. Operator must be able to Bend/Stoop, Twist and Turn while unplugging upsets as needed unless otherwise told by your supervisor.

## **Mental Challenges**

- Know what species of wood you will be running.
- Know the variety of products you will be running.
- Staying focused on the job at hand.

- Watching what is going on around you so that you do not endanger yourself or others.

## Job Duties

- Perform the work in a way that will ensure your personal safety.
- Keep units flowing.
- When the production stops check that the problem is not in your area.
- Ensure products come in and feed properly.
- Follow lockout procedures when putting yourself in harm's way.
- Never perform a task for the first time by yourself.
- Respond to fires according to procedures and training.
- Know how to operate a fire extinguisher and the emergency route for evacuation.
- Be able to lift and sort boards properly.
- When there is downtime and no plug ups keep workstation clean and safe. Downtime is clean up time.

## Essential Job Functions

- Must know and understand Lockout/Tagout procedures.
- Walking.
- Standing for long periods of time.
- Repetitious use of hand and wrists.
- Fast paced work, must be able to safely keep product moving.
- Ability to learn other Job stations.
- When jam ups occur assist in clearing them.

## Quality Control

- Fix or mark any loads that need to be fixed.
- Know the product.
- Be aware of all thickness, species, and lengths you might receive.

## Non-Routine Tasks

- Major Plug-ups.
- Plant Cleaning.
- Organization.
- Do not enter an unauthorized area without training.

## Personal Protective Equipment (PPE)

Wearing personal protective equipment (PPE) will not prevent accidents but it will lessen the injury severity. SDS requires a standard amount of PPE to be always worn. The list below shows what further PPE is required to perform these job duties. Required PPE is provided by SDS Lumber.

- Gloves, required.
- Safety glasses, required.
- Hearing protection, required.
- Goggles are required when blowing debris with compressed air.

## Hazards

### Potential hazards associated with this job station:

- Slips and falls are significant hazards - Keep walkways clear of tools, air hoses, and trips hazards.
- Excessive noise.
- Splinters from lumber. (Do not slide the material across your body without wearing proper PPE).
- Cleaning with compressed air. (Always wear your safety goggles and when blowing sawdust or bark dust wear a dust mask if appropriate).
- Strains and sprains of upper extremities and lower back.
- Struck by lumber or forklift.

## Behavior-Based Safety

Our safety processes at SDS Lumber were developed by the people and focus on behaviors. A behavior is something I do that you can see or something that you do that I can see. It is that simple. Safe behaviors that get recognized and rewarded tend to get repeated even when a supervisor is not there watching. It is important that we recognize the things we do that put ourselves or others at risk of being injured, both at work and at home.

You may observe an unsafe act or near miss. As an employee, your responsibility is to give feedback to coworkers and supervisors. To be effective, feedback should be soon, certain, specific and positive. If someone has taken the time to give you feedback, listen closely to what they have to say.

## Self-Directed Safety

Hazard recognition is the first step to accident prevention; the second step in the process is learning what you can do to protect yourself from known hazards. Here are some suggestions from your co-workers:

- If for any reason, you must put yourself in harm's way, LOCK IT OUT!
- Your Safety is your responsibility!
- Use common sense.
- Don't be afraid to hit the STOP button.
- Think about what's next and what could happen.
- Respect the machine; it doesn't care what it eats.
- Wear PPE.
- Try to keep your mind on the job.
- Be aware of your surroundings.
- Stretch often, especially shoulders and legs.
- Ask for help, don't go-it alone.
- Be sure to drink plenty of water during the summer months to prevent heat stroke.
- Dress in layers during the winter months so that you can take off layers or put on layers as you get warmer or colder.

Work Safely: Machinery is automated, can start, stop and index independently of operator. The operator needs to be able to make quick decisions in able to avoid putting themselves in an unsafe position. There are numerous sprockets, gears, moving chains and pinch points to be aware of.

Although we have tried to think of every possible hazard, there will always be the possibility that we have missed some. Knowing this, it is everyone's responsibility to constantly be on the lookout for new and unknown hazards.

## In Case of Fire

- Know evacuation routes and where fire extinguishers are located.
- If smaller than a garbage can, try to extinguish it.
- If larger, then evacuate!
- Once you are safe let your supervisor or maintenance know.

## Heat Stress

All employees will receive annual training on heat stress prevention. Several employees in each department will receive First Aid training and certification enabling them to recognize and respond to symptoms of heat stress.

## Energy Isolation (Lockout/Tagout)

Follow site-specific guidelines for each piece of machinery. Be familiar with task-based lockout procedures, their terminology and their location. Periodic audits will be conducted to ensure complete awareness of LOTO.

Lockout every time any part of your body is in HARM'S WAY. Harm's way is described as "a dangerous place or situation". This means if it is powered and you can touch it or if your body must leave a designated walkway or catwalk, YOU MUST LOCKOUT!

## Chemicals

The Safety Data Sheets for all chemicals in the Planer plant can be found in safety office. Here is a list of some of the chemicals you may encounter:

- Hydraulic fluid
- Grease
- Ink

## Emergency Response

Emergency Response/evacuation and Environmental/spill Response Manuals are available in Yard and Safety offices. In addition, you will receive annual training to keep you updated and familiar.

## Operator Control

Take a few minutes at the start of the shift to familiarize yourself with the operating controls and where the starting positions are. Ensure all controls are properly labeled and that you understand their functions.

## **Training Tips**

Here are some tips from fellow employees who are most knowledgeable about the position. It would be in your best interest to pay close attention to what they had to say:

- Always lockout when putting yourself in harm's way.
- Remember to VERIFY lockouts every time. MCC's have failed.
- STOP and think before you do things.
- Keep eyes and ears open. Pay attention to surroundings.
- Watch where you put your hands.
- Watch out for forklifts.
- Don't be afraid to ask questions.
- BE IN CONTROL! Productivity is important, but NEVER jeopardize your safety!

## **Required Training**

LOTO, Slips and falls, Ladders, Heat stress, Fire safety, Back Safety, Fields of Vision

## **Personal Accountability and Job Profile Review**

I, \_\_\_\_\_, have received and read the job profile for Strapper Operator and know that if I perform my job as described that the likelihood of me being injured is minimized. I also recognize that my own failure to do so could result in serious injury or even death. I am willing to accept full responsibility for my own actions and understand I will be held accountable.
