**Hot Work Permit – Answers to Quiz**

|          |   |
|----------|---|
| 1. True  | SDS Lumber Company Supervisors, workers, and watchmen work together to control all cutting and welding operations throughout the facility.  |
| 2. False | Cutting, welding, and grinding can be conducted in designated hot work areas without the issuance of a permit. The designated hot work areas are located at the Letourneau shop, fabrication shop, truck shop, light truck shop, and the jitney shop. Any cutting or welding outside these areas does require a hot work permit.  |
| 3. True  | Before cutting and welding is permitted. The individual responsible for authorizing cutting and welding operations shall inspect the area. As needed he shall designate special precautions to be followed and to write these precautions on the rear side of the permit.   |
| 4. True  | Each employee that is assigned responsibility for work in a Hot Work area must be trained in the proper use of fire suppression equipment.  |
| 5. False | No employee is allowed to commence Hot Work until they have been trained and authorized to do so by a supervisor.   |
| 6. False | 35ft.   |
| 7. True  | Fire watch personnel must be trained in the proper use of fire extinguishing equipment and must not perform other duties while maintaining fire watch. Fire watch is deemed necessary in cases where all potential fire hazards cannot be removed from the area, but the hot work is authorized to take place anyway. Fire watch may continue for 30 minutes to 1 hour after the completion of hot work to make sure no ignition takes place. |
| 8. False | Any hot work that is conducted inside of a confined space requires a hot work permit.   |
| 9. True  | A hot work permit is only good for one area of use. It must be filled out completely and kept on record for a period of at least 6 month.   |
