

SDS Lumber LLC.
Planer Stacker Operator Job Analysis (**JA**)

Job Title: **Planer Stacker Operator**
Department: Planer
Shift(s): Day

Date Prepared: 12/07/25
Revision Date: 12/07/25
Name:

GENERAL JOB DESCRIPTION

The Stacker Operator feeds finished lumber onto the stacker line chains, where it can be automatically stacked into units. Using foot pedals and a series of buttons/switches, regulate the flow and start/stop different chain sections as needed. Operator will need to have or acquire some limited grading ability. Any off-grade product will need to be hand sorted out, lumber crayons will be used to mark certain defects, and product will be sent back through the optimizer for re-grade on the sorter line. Watch to ensure no hang ups or upsets occur. This is a rotating position, training in other positions will be required as directed by your supervisor. Operators must make sure that the chain stays full, and the lumber is flowing straight. If a plug-up were to occur, the operator must follow the proper procedure to remove the plug-up in a safe, timely manner.
